Professional Summary

ISTQB Certified QA Engineer with 7 months of hands-on internship experience in an Agile environment. Proven ability to design and execute Manual testing, functional, regression, and exploratory test strategies while managing defect lifecycles end-to-end using Azure DevOps. Experienced in UI and API automation with Selenium, Cucumber (BDD), TestNG, and Rest Assured. Final-year IT undergraduate at University of Moratuwa, seeking a Quality Engineer role to deliver reliable, high-quality software.

Professional Experience

Quality Assurance Engineer Intern

Cultive 8 – Sri Lanka

Mar 2025 – Sep 2025

- Performed Manual, functional, regression, UI/UX, and exploratory testing to identify defects and usability issues. Logged, tracked, and verified defects using Azure DevOps, providing clear reproduction steps, environment details, and supporting evidence.
- Collaborated with Developers, Business Analysts, and Project Managers during Agile sprint planning and review sessions to clarify requirements and validate new features.
- Maintained accurate test documentation and execution reports
- Conducted exploratory testing to uncover edge-case issues impacting user experience.

Education

BSc (Hons) in Information Technology

Jun 2022 - Aug 2026

Faculty of Information Technology,

University Of Moratuwa - Sri Lanka

G.C.E Advanced Level - 2020

Sri Sumangala Girl's Collage, Weligama

Combined Maths- A, Chemistry - A, Physics - C

Certifications

ISTQB Certificate - Foundation Level (CTFL) - Issued by ISTQB

Web Design for Beginners (University of Moratuwa)

Java Programming (Great Learning)

Project Experience

QA Automation Project - University Module (Group Project)

- Analyzed Software Requirement Specification (SRS) and derived comprehensive UI and API test scenarios.
- Designed Behavior-Driven Development (BDD) test cases using Gherkin syntax.
- Automated UI test cases using Selenium WebDriver integrated with Cucumber and TestNG.
- Automated REST API test cases using Rest Assured.
- Logged and categorized defects based on severity and priority.
- Followed complete QA lifecycle

Level 2 Software Project(2023-2024)

Project Name : E-Commerce Website - Agri Market

Developed a multivendor e-commerce solution allowing farmers to sell produce directly to buyers without intermediaries.

Role-Full Stack Developer

- Technologies : React, TypeScript, NodeJs,MSSQL,Bootstrap, Prisma

Food Ordering App (individual)

This app allows users to browse restaurant menus, place food orders, and pay using PayPal. The backend is powered by MongoDB for storing restaurant, user, and order data.

- Technologies: React, Next JS,Mongo DB

Level 1 Hardware Project(2022-2023)

Project Name : Automated Face Mask Recycling Machine

Designed and built an automated system to recycle disposable face masks into reusable plastic ,reducing environmental pollution.

- Technologies : C language, Atmel Studio,EasyEDA,Proteus, Simulation, Atmega32

Technical Skills

Testing Expertise: Functional Testing, Regression Testing, Smoke Testing, GUI Testing, Test Case Design, Defect Lifecycle Management

Automation & Tools: Selenium (Basics), Cucumber (BDD), TestNG, Rest Assured, Postman

Test Management & Collaboration: Azure DevOps,Bug Reporting & Tracking

Programming & Databases: Java, Python, C, TypeScript, MySQL

EXTRA- CURRICULAR ACTIVITIES

Member of Leo Club of University of Moratuwa
